

Star Data's Dashboard Services

Star Data Systems' exclusive Dashboard feature enables you to stay in touch with every aspect of your project from anywhere in the world. As your project begins you are assigned a unique username and password which enables you to log onto our secure client website and choose from a variety of reports and capabilities you never thought were possible.

As you enter your project website you are presented a choice of options ranging from downloading the latest Call Report with counts of the current figures for dials made, busy signals, not at home, appointments, completed interviews and fresh sample, all available to you by simply clicking the link to your report.

You can also download special reports regarding your project, download MP3 files of any of your interviews through our exclusive Virtual Monitoring feature, or turn to the Pulsar Web link and look at up-to-the-minute tabulations of key variables and quotas.

Other features of the dashboard include:

- Call Report for Telephone Interviews
- Counts of Key Questions
- Scan Survey Viewer
- Quota Information
- Virtual Monitoring of Telephone Interviews
- Cross Tabulations and Charts via Pulsar Web
- Postage Reports
- File Manager
